

Alle an Bord! - The Global Network

In many cases, refugees have versatile professional knowledge and experience or informally acquired skills.

The **Alle an Bord!** network supports them in

- looking for a suitable job, education or training
- removing legal and language barriers
- as well as finding their way and orienting in the German professional and educational system.

Within the **Alle an Bord!** network there are different institutions in Schleswig-Holstein, including seven districts and one district-free town, offering consultation, coaching and support.

The target group of the **Alle an Bord!** network's projects are all refugees regardless of their residential status or age. The network puts special emphasis on refugees with particular access barriers such as asylum seekers, people with tolerance status, women and traumatised people.

Alle an Bord! closely works together with local parties within the region, supplements and supports the offers provided by the job centres and employment agencies and cooperates with the "*Mehr Land in Sicht!* – Arbeit für Flüchtlinge in Schleswig-Holstein" network across the country, which provides respective offers in other regions.

Alle an Bord! offers information material and events for people working voluntarily or professionally in integration, as well as for refugees – regionally as well as supra-regionally.
